CBI CBI HEALTH GROUP

We will begin with a presentation and discussion about the Canadian Health Care System. This comprehensive conversation will help everyone understand how Canada delivers care and how it is paid. We can compare the Japan system with Canada's system and ask questions so we fully can relate what they do with what is done in Japan. This discussion will be helpful as we visit facilities in Toronto and Hamilton. Our discussion facilitator, Ms. Tanja Yardley, is an administrator with the CBI Health Group.

Note: We are expecting to meet Ms. Josie McGee, the National Director of Health Care Innovation for the CBI Health System, on Tuesday, June 30th. However, it is possible she will be in Vancouver on Monday and if so, she will team present with Ms. Yardley. Her focus will be building referral partnering relationships for the delivery of care.

Please see www.cbi.ca/web/cbi-health-group/.
